IGNORANCE THE DANGER

The greatest menace to social progress is not communism. Nazism. Pascism, or any other ism.—it is just pure unadulterated ignorance; and in some cases it is bolstered by a sneering indifference which has its thinking the difference which has its education in weekly dosses via "the Press."

The "heads" of the Causadan raliroads are once again getting excited shout limitization. Now the point is, are the people of Alberta willies to stand for another his burch of farmhave we got enough farmers? We certainly need immigration, but not of the type which the ralirond companies seem to specialize in. At the present we have an overflow of our own young people looking for an outlet, and they which seems to offer the most attractive career at this period, and the next decade will see but overflow

The type of government we have had up to the present has been the "to heck with tomorrow" kind, which has given us, not an inflow of immigration but an cutflew of young people via the freight trains.

The "heads" of the railroads set a salary which runs into astronomical figures, just for sitting around and doing a little thinking. The salaries are obtained from a business with a \$50,000,000 deficit, so it proves that thinking lan't a bad way of passing the time after all.

Then we have thoughtful people who start up on "shoe-string" principles, and before we realize it we find them operating a whole string of elevators, and there's no "piking" about the way they are built or operated.

Now if we were to keep on investigating and whinking for ourselves, as gifted ourselves as find ourselves as gifted ourselves saying. "If these people find it worth while to come here and exploit our produce why cannot we estives for our own benefit and the young people who are coming along? If the profits from our produce will keep a whole army of parasites living the second of the profits of the profits from our produce will keep a whole army of parasites living the statistical and can keep an insattable monster like the raffrads in operation, fat salaries included, then why cannot we have skilled workmen invited to come and settle amongst us so that we can have our young men and women ampresented to a trait.

We have "scales" of timber, cold.

We have "scales" of timber, cold.

We show "scales" of timber, cold.

We show "scales" of timber, and
the whole "schoold" waiting for some
exapenters, milities, lumberners, and
the whole "schoold" waiting for some
"thirking innovine" to start the whole
thing going. We could have whole
towns alone with factories suitably
make a some some some some some
thing going. We could have whole

meaning the some some some some
thing going to the some
thing going the some
thing going to the some
thing going the some

mitted ourselves to think.
Here's a little thing to set your
brains to thinking: The pregent government of Alberta, it has often been
reported, was returned solely because
the farmers were sore about the prices
they were getting for their produce.
Now this government, for the first time

money system and use products as a formation. Now this is a direct size at the banks, which, believe it or no are centrolled ultimately from it are controlled ultimately from the control of the system of the syst
